RESOLUTION #3

Moved By: Cathy Livingston
Seconded By: Cathy Monck

That Minor Variance A-1-2018, by Dana Mellon and Sharon Mellon, of the Ward of Bastard & South Burgess is approved as submitted for the following reasons provided the attached conditions are complied with:

REASONS:

1. The potential water setbacks for the development have been maximized given the lot configuration;
2. There are no known land use compatibility concerns;
3. The application is consistent with the Waterfront Development Policies of the Official Plan.

CONDITIONS:

1. That this approval is based on the following specifications and that any deviation from these specifications will require subsequent review and approval by the Township:
 - a. The dimensions and location of the proposed structure(s) shall be consistent with the information noted in the site plan application (and updated/revised information) and/or minor variance and the approved site plan drawing;
 - b. All setbacks and development parameters shall be consistent with the details noted in the approved site plan and compliant with Zoning By-law 2005-6 where no variance has been granted;
2. That the existing dwelling and existing uncovered attached decking be removed prior to, or concurrently with, the issuance of a building permit for the proposed dwelling;
3. That the applicant acknowledge that no habitation is permitted on the existing Recreational Vehicle that is currently being stored on the subject property;
4. That the existing buffer of natural vegetation between the subject property and the abutting property to the east be maintained and enhanced;
5. Existing vegetation within the 30m setback shall be generally maintained and enhanced, except for that disturbed by the proposed development. The applicant shall encourage the development of a shoreline naturalization buffer (no disturbance area) extending 15m back from the high water mark. A moderate shoreline access path through this area is permitted;
6. That storm water runoff be captured and directed away from the lake to an area of infiltration;
7. That all outdoor lighting be downward cast, and as minimal as required to meet the required objectives;
8. That all materials used on the exterior of the structure be of a natural material or a colour reflective of the surrounding environment;
9. That the applicant maintain all on site drainage patterns;
10. That sediment and erosion control measures be implemented during all stages of construction. This must include some form of silt fencing between the areas of development and the lake. This fencing must remain in place until all areas that were disrupted are fully stabilized (i.e. no bare soils remain);
11. All excavated material is to be disposed of away from the lake, and all construction material shall be stored in a location well away from the lake; and
12. Future development not included in this application will be subject to review and approval by the Township, Conservation Authority and/or Parks Canada and any other governing agency or regulations where applicable.
